

Description

The SPB-8 is a medium range aluminium alloy single point load cells, which has been specifically designed for platform weighing applications, although it is equally suited to other weighing and force measurement applications where high accuracy is required from a low cost product.

The SPB-8 is suitable for use in platforms with sizes up to 350mm x 350mm. It is environmentally sealed as standard to IP66.

The SPB-8 series can be supplied on it's own or combined with our extensive range of instrumentation to provide a complete load monitoring system.
